

Design a Mission Patch

Let's get creative!

Mission Patches:

A mission patch is a cloth reproduction of a spaceflight mission emblem worn by astronauts and other personnel affiliated with that mission. It is usually executed as an embroidered patch. The term space patch is mostly applied to an emblem designed for a crewed space mission. Traditionally, the patch is worn on the space suit that astronauts and cosmonauts wear when launched into space. Mission patches have been adopted by the crew and personnel of many other space ventures, public and private.

Now you have created your teams, selected a mission, and developed your drawing/sketching skills, it is time to design a mission patch.
